

EDGE COMPLETE

Reduce complexity. **Deliver consistency.**

EDGE COMPLETE is a fully managed ATM-as-a-Service model that consolidates operational responsibility and accountability into a single, predictable framework allowing institutions to remove complexity while preserving strategic oversight.

THE COMPLEXITY

- Fragmented vendor ecosystems dilute accountability and increase operational complexity.
- Disproportionate internal effort required to manage service, cash, compliance, and reporting.
- Unpredictable operating costs driven by maintenance, lifecycle upgrades, and regulatory change.
- Elevated operational and compliance risk competing with strategic priorities.

Managed Operations

Complete lifecycle responsibility for ATM and ITM performance.

Single Accountability

One accountable partner across service, cash, compliance, and reporting.

Predictable Outcomes

Stable operating economics, reduced internal burden, and consistent uptime.

PROGRAM CAPABILITIES

- **End-to-End Ownership:** Hardware, software, installation, operations, and lifecycle management.
- **Service & Cash Operations:** First and second line maintenance with integrated cash services.
- **Compliance & Security:** Regulatory management, ongoing patching, and system hardening.
- **Reporting & Governance:** Portfolio-level reporting with performance and financial visibility.
